

UPDATE

Check Before You Eat

New data received after the release of the ministry's 2005–06 *Guide to Eating Ontario Sport Fish* show high levels of Polychlorinated Biphenyls (PCBs) in sport fish from Nepahwin Lake. The Ministry of the Environment (MOE) recommends that you follow the

updated consumption advice for the species in the chart below. The MOE will continue to monitor Nepahwin Lake for fish contaminants. It is recommended that any fish species, other than those listed below, not be consumed by women of child-bearing age and children under 15.

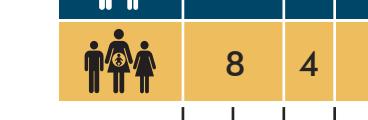

- Identify your fish species.
- Measure the total length of the fish.
- Refer to length and species in the charts below for consumption advice. For fish outside size ranges, see page 9 of the *Guide*.
- If you intend to eat fish from other than this location, please consult the *Guide*.

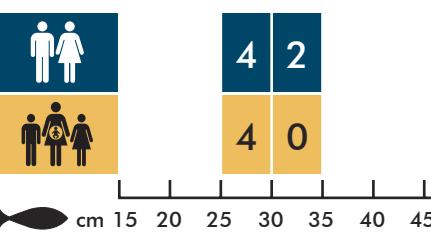

Smallmouth Bass

White Sucker

Rock Bass
